MIXER/BLENDER Model 75

Patented, Twin Action, Varied Pitch Screw design gives peak blending efficiency. Larger doors permit shorter cycle time, easier cleaning, and positive closure for regular or vacuum operation. Fully sanitary with crevice-free, stainless steel interior and easily removable shaft seals. Reversing screw is a self-cleaning feature that quickly moves any leftover product out of the unit, and permits both discharge doors to be used simulatenously.

4 - 174 M. M. Walder . *

Shaft mount drives on 2000 lb. and smaller units. Chain and sprocket on larger size units for reduced floor space requirements.
