HOLLYMATIC 710/45 PATTY MACHINE FEATURES AND SPECIFICATIONS

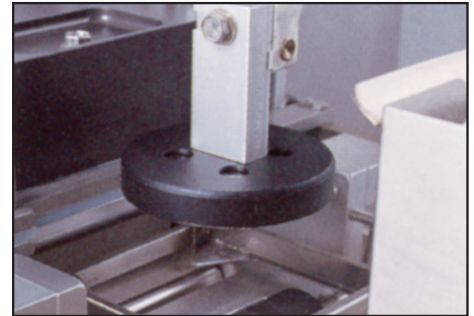

IMPROVED STACK AND COUNT SYSTEM

The state-of-the-art counter is not limited by the number of patties. You are able to set the counter for any number of patties in a 6" high stack.

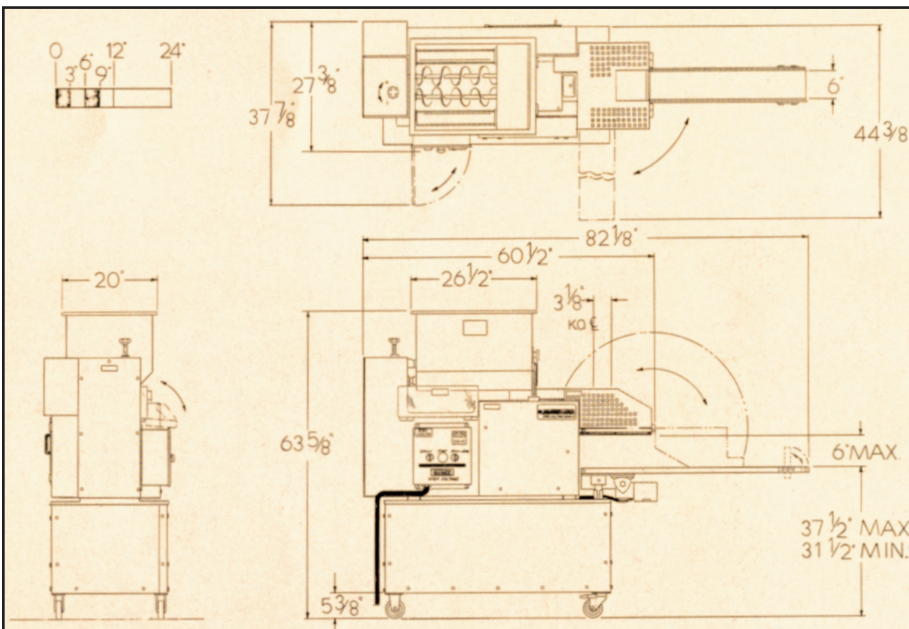

ADJUSTABLE FEED SCREWS

The 150 lb. hopper is equipped with twin feed screws. Rotation can be adjusted, while the machine is running, to minimize overworking of the product.

SIDE NOTCH PAPER INTERLEAVING SYSTEM

Unique design eliminates constant adjusting competitive systems require. The knock out cup assembly does not need adjustment every time K.O. cup is changed, reducing changeover time.
