

FORPAK

Stacker | GSS Series

Fast and Efficient

Baked Goods

Protein

Stacks at a rate of 100 pieces per minute per lane, is ideal for stacking frozen protein patties and bakery products. Forpak Stackers are the industry's only stackers with built-in flexibility to handle products of most sizes and shapes with minimal changes.

Why Forpak?

- Reduce labor costs by 30-50%
- Custom-engineered solutions
- Reduce exposure to human contamination
- Reduce Workman's Compensation claims by minimizing repetitive motion
- Allow for increasing production speed and downstream automation
- Increase production speed throughput
- Simple transfer to downstream automation

Product Features

- Stacks different shapes
- Full wash-down capability
- All-Electric option available
- Stainless Steel construction
- Rotating Pendant HMI available
- Multiple recipes for multiple SKUs
- Can be manufactured with 1 to 10 lanes
- Servo-controlled actuators for building stacks
- Custom-engineered solutions available
- Allen-Bradley PLC & PanelView HMI controlled

Hygienic & Sanitary Design

- NSF 3A Standard
- BISSC Standard for Baking
